Are you interested in learning more about the environment and helping to make a difference while earning 3 college credits?

Pace University’s Summer Environmental Program offers a select group of high school students, currently in their sophomore or junior year, an opportunity to earn 3 college credits while learning about various aspects of the environment and how they can make a difference. These students take a college-level course that stresses hands-on experience and interaction with environmental professionals within Pace and the surrounding community.

Are you interested in learning more about the environment and helping to make a difference while earning 3 college credits?
Pace University has a long, rich, and distinguished history of dedication to environmental issues. Our Environmental Studies Program, the Biology and Health Sciences Department of Dyson College of Arts and Sciences, the Pace Academy for the Environment, and the Environmental Center all work together to envision and implement academic programs, policies, practices, and ideas that sustain a mutually enhancing relationship between nature and society. Our goal is to help shape the future of the regional and global environment while empowering students to not only understand the issues but to protect and improve their environment. In keeping with its commitment and vision, Pace has designed this innovative and timely Summer Environmental Program for high school students. Now in its second year, this 3-credit program offers individuals the opportunity to gain practical knowledge about current environmental issues, both inside the classroom and through field trips.

HIGHLIGHTS

- Work with renowned faculty from the Pace Academy for the Environment, Biology and Health Sciences, Environmental Studies, and other collaborating departments.
- Gain valuable experience from experts working for environmental agencies and from Pace’s own Environmental Center.
- Explore Pace’s onsite facilities and beyond with exciting field trip experiences to Rockefeller State Park Preserve, Croton Point Park, Hudson River Sloop Clearwater, and the Stone Barns Center, all of which bring the environment to life.
- Jump-start your college career this summer by earning 3 college credits while gaining knowledge about important environmental issues.
