Is your personal computer protected?

Norton AntiVirus scans and cleans your files, instant-message attachments and email messages. And, it automatically removes viruses while you work. One of the features available is automatic updates which will protect your computer from new viruses.

This package works with the following platforms:

- Windows 98
- Windows Millennium
- Windows 2000
- Windows XP

Note: To connect to the Pace network, the recommended operating system of choice is either Microsoft Windows 2000 Professional or Windows XP Professional.

Computer requirements for installation:

- 70 MB of available hard disk space
- CD-ROM or DVD drive
- Internet Explorer (minimum version 5.0 required)

To purchase a discounted copy of Norton AntiVirus 2003 for your personal computer, visit http://www.pace.edu/doit/itpurchases and click Dell For Students, Faculty & Staff Personal Purchases.
